## ABOUT ME

Hi, I am Jay Chavan, 19 years old. I am currently pursuing my undergraduate degree in computer science from a renowned university of SMT. CHM college. I have decided on my career in this field as I have special engrossment in the computer, its programming language, and the topics concerned in the timeline. I could recognize my eagerness to learn this subject as I have an insight into it. I would like to gain all possible knowledge in the coming years to build a positive outcome for myself
